

# SHUR DECK

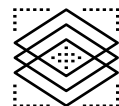

**NEW!**  
GLASS LATH  
OPTION

## WHERE TO USE SHUR DECK?

Mer-Ko, one of the original manufacturers of waterproofing and pedestrian deck coating systems, has been producing widely used waterproof membrane systems and underlayments for over 40 years.

The Shur Deck system is designed to provide seamless, long-term protective solutions for residential, commercial, multi-family and affordable housing projects.

## YOUR DECK AND BALCONY WATERPROOFING SOLUTION

Shur Deck is a multi-layer, cementitious roof and walking deck system designed for use over plywood or concrete substrates. This system consists of reinforcing lath, a series of cementitious layers and acrylic sealer. Shur Deck is a seamless, trowel applied system that provides longterm durability and waterproofing protection.

CLASS A and 1 Hour Fire Rating  
IAPMO Evaluated • ER-517

Seamless and Monolithic  
Durable and Solvent-Free

System can be applied to plywood or concrete decks

Economical and easy to install.  
One cement system.

### SHUR DECK (Over Plywood)

This system is designed for elevated plywood decks. It features the following layers: Sheet Membrane, Metal or Glass Lath, Base Coat, Body Coat and Topcoat. This is a cost-effective, dry-polymer, easy-to-install system, requiring only ONE cement. This also features the optional MK-71 Mer-Ko Glass Lath for optimum corrosion resistance.

### SHUR DECK PRO (Over Plywood)

This system is designed for elevated plywood decks. It features the following layers: Sheet Membrane, Metal or Glass Lath, Base Coat, Membrane with Fabric reinforcement, Body Coat and Topcoat. This system offers all the same benefits as Shur Deck, but includes the MK-25 Mer-Ko Membrane and MK-75 Mer-Ko lath, for additional waterproofing and crack resistance properties.

### SHUR DECK (Over Concrete)

This system is designed for elevated concrete decks. It features the following layers: Base Coat, Membrane with fabric reinforcement, Body Coat and Topcoat. This is a cost-effective, fast drying, low odor, acrylic and cement solution.

### BENEFITS OF SHUR DECK:

These systems are seamless and monolithic, will not soften under high temperatures. They are environmentally friendly and can be installed without any solvents. Shur Deck systems offer outstanding long-term durability and performance, while providing a wide array of decorative finishes, textures and colors.
